

Simple Stopwatch

Project created by Sidda Satya Sri

Problem Statement / Objective:

The objective of this simple stopwatch is that here you can count the hours, minutes and seconds. Our stopwatch will have functionality of Start, Stop, Reset.

Requirements:

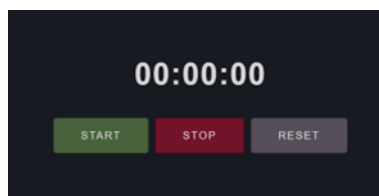

- ❖ The simple stopwatch should be in the center.
- ❖ Should contain 3 Buttons inside the box you created.
- ❖ It should show hours, minutes and seconds.
- ❖ Background should be black.
- ❖ The first button should be start button while we click on that, the time should start running from 1 second.
- ❖ The second button should be stop button while we click on that, the time should pause running.
- ❖ The third button should be reset button while we click on that, the time should be 00.00.00.

Tech Stack Used:

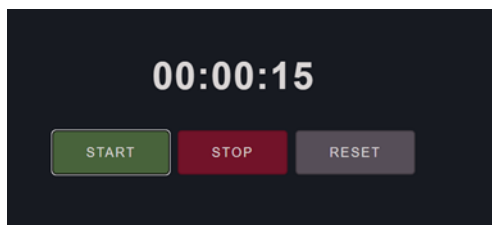

- ❖ Html5
- ❖ CSS3
- ❖ JavaScript

Result / Output:

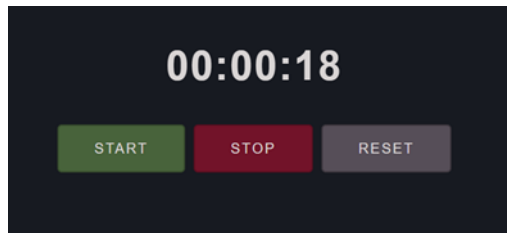

Case 1: Initially the stopwatch

Case 2: After pressing start button

Case 3: After pressing Stop button the time will be in pause

Case 4: After pressing Reset button
